

# *Demonstration*

Hugo Lhuillier  
December 9, 2017  
In my apartment

# Outline

---

1. This is how a section starts

2. Enjoy!

*This is how a section starts*

---

# This is the main frame title

This the subtitle

---

The maths is standard

$$\mathbb{E}(X) = \int xf(x) \, dx.$$

and so are the items

- |           |           |
|-----------|-----------|
| • Items   | 1 Items   |
| • Are     | 2 Are     |
| • Rather  | 3 Rather  |
| • Classic | 4 Classic |

# A subtitle is not needed, duh

---

## Definition 1: Beamer

*A really useful thing, but takes hours to get rolling.*

## Lemma 1

*Beamer is really useful if and only if your presentation includes cross-referencing.*

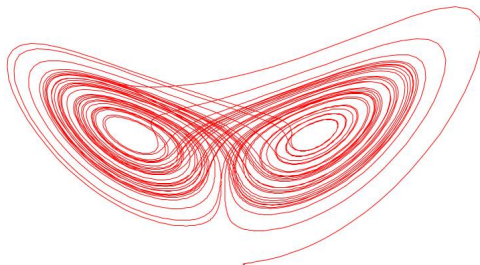

**Proof** It took me an hour to make a similar theme on Keynote, more than four hours on Beamer. But I can use things like buttons here. □

# This is the next page

---

Figures are almost unchanged as well, as Figure 1.

**Figure 1:** This is a blurry figure

*Previous page*

*Final page*

And this is the final page  
Hooray!

---

Tables are also identical.

**Table 1:** Template users

Current user(s)	Starting date
Me	December 9, 2017

*Enjoy!*
