In my apartment

Outline

1. This is how a section starts

2. Enjoy!

This is how a section starts

This is the main frame title

This the subtitle

The maths is standard

$$\mathbb{E}(X) = \int xf(x) \, dx.$$

and so are the items

- Items
- Are
- Rather
- Classic

- 1 Items
- 2 Are
- 3 Rather
- 4 Classic

A subtitle is not needed, duh

Definition 1: Beamer

A really useful thing, but takes hours to get rolling.

Lemma 1

Beamer is really useful if and only if your presentation includes cross-referencing.

Proof It took me an hour to make a similar theme on Keynote, more than four hours on Beamer. But I can use things like buttons here. □

This is the next page

Figures are almost unchanged as well, as Figure 1.

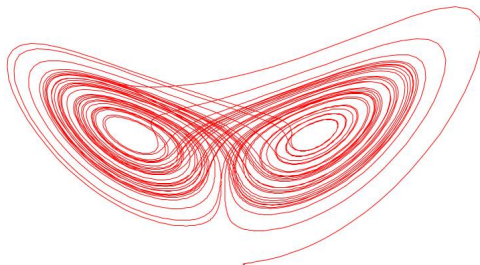

Figure 1: This is a blurry figure

Previous page

Final page

And this is the final page
Hooray!

Do not hesitate go give me feedback, raise issues, or even pull request on Github

Enjoy!
